## **Anniston Milestones/Facts**

#### **Milestone Dates**

- Weapons storage began 1961
- ANCDF construction began 1997
- Construction concluded 2001
- Disposal operations began August 9, 2003

TYPES OF CHEMICALS	TOTAL POUNDS
GB Nerve Agent	873,020 (19%)
VX Nerve Agent	1,657,480 (37%)
Mustard Agent	1,976,760 (44%)
ANCDF TOTAL	4,507,260

#### ANCDF chemical operations have safely disposed of:

- 42,762 GB-filled rockets and warheads
- 1,596 GB-filled 8-inch projectiles
- 49,649 gallons (451,314 pounds) of liquid GB
- 23 igloos emptied after 1,541 munition deliveries

# Leading the Way to a Safer Future

The Anniston Chemical Agent Disposal Facility is safely destroying the stockpile of chemical weapons stored at Anniston Army Depot while ensuring maximum protection for the environment, general public, and personnel involved in the disposal effort.

- Disposal is safer than continued storage.
- Incineration is truly a safe, efficient disposal process.
- More than 39 million pounds have been safely incinerated by the U.S.
- The Army is committed to the safety of the community and the environment.
